ABOUT ME

Motivated Information Science Engineering student with hands-on experience in full-stack web development and AI-powered applications. Proficient in building scalable, maintainable software using React.js, Node.js, Express.js, and MongoDB, with strong SQL and database skills. Passionate about clean, efficient code and collaborative development within agile teams. Eager to contribute to product development in a real-world SaaS environment while continuously learning and applying modern engineering practices.

SKILLS

Languages	Java, Python, JavaScript, C, C++
Web Dev	React.js, Node.js, Express.js, HTML, CSS, Tailwind CSS
Databases	MySQL, MongoDB — schema design, querying, relational modelling
Tools	Git, GitHub, VS Code, Google Colab, Postman
Core CS	DSA, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering
AI / ML	NLP, TF-IDF, Logistic Regression, Naïve Bayes, Text Classification
Soft Skills	Leadership, Communication, Teamwork, Problem Solving, Code Review

PROJECTS

AI Recruiter — AI-Powered Resume Screening Platform —

Tech Stack: React.js, Node.js, Express.js, MongoDB, NLP, Tailwind CSS

- Participated in the full software development lifecycle — from requirements gathering and design to coding, testing, and deployment of a production-ready recruitment platform.
- Wrote clean, modular, and maintainable code following MVC architecture and established coding standards, enabling easy extensibility.
- Developed a secure resume upload system supporting PDF and DOCX parsing; implemented input validation and error handling to ensure reliability.
- Built semantic candidate matching using NLP and skill extraction (TF-IDF, Logistic Regression), improving candidate ranking accuracy.
- Designed an analytics dashboard for recruiters — applied data-driven UI patterns to surface insights and candidate rankings clearly.
- Collaborated across frontend and backend layers; participated in iterative self-review cycles equivalent to code review practices.

Blood Bank Management System —

Tech Stack: Node.js, Express.js, MySQL

- Developed a donor registration and blood inventory tracking system; structured relational database schema in MySQL for efficient querying and data integrity.
- Implemented role-based authentication (admin, donor, hospital staff) ensuring secure, appropriate data access — demonstrating understanding of software security principles.
- Applied MVC architecture and design patterns to keep the codebase scalable, readable, and easy to maintain or extend.
- Debugged and troubleshooted data consistency issues in multi-user scenarios, strengthening skills in systematic problem diagnosis.

- Wrote technical documentation covering database schema, API endpoints, and setup instructions to support collaborative development.

EDUCATION

B.E. in Information Science Engineering The National Institute of Engineering, Mysuru	2023 – Present CGPA: 7.5
Class 12 – Karnataka State Board MGM PU College, Udupi	2021 – 2023 95%
Class 10 – Karnataka State Board GMHS South Volakadu, Udupi	2021 93%

CERTIFICATIONS

- Introduction to Cloud Computing – IBM (Coursera) — directly relevant to SaaS platform development and cloud-based deployments
- Introduction to Cybersecurity Fundamentals (Coursera) — foundational knowledge for building secure, compliant software systems

POSITIONS OF RESPONSIBILITY

Student Ambassador — Learn Overseas	Nov 2025 – Present
Club Secretary — Credit Circle Club	2025 – Present
Event Management Lead — Credit Circle Club	2024 – 2025
Marketing Lead — ARISE Department Fest	Dec 2025
